- Crisis services 365 days a year

## Treatment Planning and Rehabilitation Services

In planning treatment, professionals skilled in mental health, deafness, and American Sign Language work as a team to assess each potential client examining his/her capabilities from a medical, psychiatric, social, cultural, educational,

vocational and behavioral perspective. Individualized treatment plans and programs are determined from the results of these assessments and by utilizing the client's

input to create a comprehensive approach to treatment.

Once a treatment plan is prepared the care coordinators, life skills instructors/coaches and therapists are assigned to work with clients, families, and social service agencies to assist in treatment as needed and agreed upon by the client.

## Crisis Intervention and Acute Stabilization Services

Aspire Indiana also provides 24-hour crisis services seven days a week. For those requiring short-term hospitalization, Deaf Services offers acute stabilization admission to Community Hospital North where they provide sign language interpreter. Long-term admission is referred to LaRue Carter Hospital where Aspire is designated as a gatekeeper for our deaf clients.

## Outpatient Services

Aspire Indiana's Outpatient Services for deaf persons targets individuals and families with a wide variety of diagnoses and needs. The goal is to help clients cope more effectively within their environment.

Outpatient services also include marital/couple and family therapy, as well as pharmacological treatment. With Rehabilitation services, our care coordinators and life-skills instructors continue training clients who are moved out from our group home to an outpatient setting by assessing their needs and developing skills and resources in order to live independently in the community.

With Employment services, our employment specialist provides training, coaching, and support for clients who are interested in employment at the community.

## Residential Services

With a goal of maintaining adults in their own communities and decreasing the high potential of isolation deaf adults experience, Deaf Services has residential services for people with severe and persistent mental illness.
